Madison Lee Goff

JAN 19, 1944 - MAY 26, 2023

Born 19 Jan 1944, Died 26 May 2023. Madison Lee Goff, better known as Lee Goff, was born in Glendale, California. He moved to Hawaii in 1961, completing his BS degree in Zoology at the University of Hawaii, Manoa in 1966. Following his time in the U.S. Army (1966-1968), he completed his MS degree in Biology at California State University, Long Beach, in 1974 and his PhD in Entomology from University of Hawaii, Manoa, in 1977. He was employed as an Acarologist at B.P. Bishop Museum from 1977 until 1983 when he moved to the University of Hawaii at Manoa. He retired from UH Manoa, as a Professor of Entomology in 2001, and, later, from Chaminade University of Honolulu in 2013, where he was a Professor and Director of the Forensic Sciences Program. He was well-known for his work in Forensic Entomology and as a Consultant to CSI. He loved surfing, riding his Harley, and travelling. He never really grew up. He was predeceased by his fish, Sashimi and Poke, a number of relatives, a lot of people he knew, and even more he had never met or heard of during their lives. He had an amazing sense of humor and, as many may have guessed, wrote most of this himself. He is survived by his wife, Dianne, 2 daughters, Dana and Alaina, 8 grandchildren, Niko, Nicia, Joseph, Amiabella, Neeva, Sawyer, Asha, Sadie-Rose, and 1 great-grandchild, 'Auli'i. Services will be held on Saturday, August 26th, 2023 at Valley of the Temples from 10am-1pm.

Dear Dianne and family, We are so sad to hear of the passing of Lee. We have fond memories of him and his infectious laugh and sense of humor.in 2011, you both traveled to Guam for him to share his knowledge at our 2nd Regional Forensic Science symposium.We remember a quiet dinner the four of us shared at what was then our favorite restaurant. We had expounded that the place was so wonderful, however on that particular evening the service was so bad... but somehow Lee and perhaps the bottle of Cabernet Sauvignon managed to have us all laughing so hard throughout that night; that the poor service was forgiven.Lee left his mark on this world and will be missed but never forgotten.May he rest in peace.Frank & Sharon Ishizaki

We were blessed to have known Lee. He was a bright light in this world. He had an infectious sense of humor and enthusiastically shared his knowledge of forensic science with his students. He joined us in 2009 and then again in 2011 to share his expertise in Friends of the Crime Lab, Inc. 1st & 2nd Regional Forensic Science Symposium here in Guam. He will be missed. Our hearts go out to Dianne and family. May he rest in peace.Frank and Sharon IshizakiYona, Guam

I hope that the University colleagues of Dr. Goff will also publish an obituary in a scientific journal that would reflect his indispensable contribution to the taxonomy and ecology of chigger mites.

I sit here with a heavy heart, grappling with the news of Dr. Lee's passing. It is difficult to find the right words to express the profound impact they had on my life and the depth of gratitude I feel for their guidance and support. When I first embarked on my academic journey, I was filled with uncertainty and self-doubt. It was Lee who gave me the courage to pursue a PhD in Entomology. Lee genuinely cared about my personal growth, encouraged me to embrace challenges, and taught me invaluable life lessons. Thank you for everything Dr. Lee, I am forever thankful for your support!! Rest in peace.-Priscilla Seabourn

I have such fond memories of Dr. Goff. He was my inspiration that led me to become interested in entomology and my outside mentor through my masters. It was a book on forensics that discussed forensic entomology and Dr. Goff that led me to Chaminade and started my educational pathway. My condolences to his family and friends; his down to earth personality and unique humor will be missed.

Dear Dianne and family It was a great privilege to have known Lee over many years, when he attended forensic entomology meetings in Europe and, most recently, when I joined him in an interview for the First Digital World Conference of Forensic Entomology in September 2020. He was always very warm-hearted and generous with his advice and I will miss his "Aloha's" from Hawaii. Please accept my sincere condolences on your sad loss. All best wishes, Martin Hall

I took my first course in Forensic Sciences in Florida and Lee was one of the funniest and kindest person I have ever met. What he taught was a science that was little known back then, and it was fascinating. He will be missed both as a person and as specialist in his field.
